MERN-STACK

- Cloud-based notes web application.
- Uses **MongoDB** as database, **ExpressJS** as server, **ReactJS** as front-end framework, **NodeJS** as runtime environment.
- Added features like add note, delete note, update note and change password.
- Notes can be obtained across devices.
- Use id : test@test.com , password : testtest.

iSee

[Link](#)

REACT

- Initiate video calls instantly with a unique code, no need for account setup or installations.
- Engage in live chat during video calls for seamless communication.
- Customize your display name for added privacy during calls.
- Experience a responsive and user-friendly interface designed with **Tailwind CSS** for a sleek look and feel.
- iSee leverages modern technologies such as **React**, **WebRTC**, **Socket.io**, and more to provide a reliable and efficient video calling experience.

TextAndTools

[Link](#)

REACT

- **React** web application for text utilities.
- Simple text utilities like covert to uppercase or lowercase, trim to desired length and search for occurrences.
- Added unique features like extract e-mail id or numbers and replace words.
- Used custom CSS to provide the webapp with various visual themes.
